

RCSI

RCSI Energy Policy

The Royal College of Surgeons in Ireland is committed to managing its energy with a view to reducing energy consumption in line with ISO50001 and meeting Ireland's Energy Targets. While managing energy RCSI will continually provide an enhanced education and research environment.

Our policy is aligned with energy management best practice with intent to decrease our impact on and preserve the environment for all future generations.

RCSI will endeavour to achieve these objectives by;

- Providing a framework for setting and reviewing objectives and energy targets.
- Committing to provide the availability and necessary information and resources required to achieve and where possible exceed our energy objectives and targets.
- Implementing a system which shall meet all applicable legal requirements and other requirements related to energy efficiency, energy use and energy consumption.
- Striving to continuously improve our energy performance and the Energy Management System (EnMS) by regularly monitoring, reviewing and amending where necessary.
- Ensuring that energy performance and efficiency becomes an integral part of our procurement process when considering new equipment and services.
- Ensuring that energy performance and efficiency is at the forefront of design when completing new works, renovations and upgrades.
- Promoting energy awareness across the campus, encouraging staff, students and stakeholders to minimise energy use where practicable.

A handwritten signature in black ink that reads "Cathal Kelly".
