Summary of Career to date. (Max 100 words)	<p>To date my 20 years career has been like surfing from one tide to another. And 21st century, where skill sets are rapidly changing, I started as clinician and went on to be an academic. But found hard to connect to students. To hone those skills, I got on another tide of medical education which I thoroughly enjoyed till the crest and paddled out and just caught a new stronger one of professionalism. I am optimistic that this current post will be successful for me and RCSI.</p> <p>08.12.2010 to date Professionalism lecturer RCSI Bahrain</p>
