RCSI

Teaching Experience:

I have been in the academia for the last 15 years teaching across undergraduate and postgraduate nursing Programme. I have been coordinating several modules including Research Methods, clinical Health Assessment, Health Promotion, Nursing Theory, Education & Training and Reflection on Practice. I am heavily involved in supervising master student dissertations. I have developed the module descriptors for several modules and contribute in reviewing the curriculum and validation process.

Current Research and Scholarly Activities:

- Area of interest**
- Men’s health
 - Testing and evaluation in nursing education
 - Advance Practice Nursing (APN)
 - Awareness of Colorectal and Prostate Cancer
