What is value & how do we achieve it?

RCSI 2023 webinar: Assessing the value of new cancer treatments and innovations

Avril Kennan, PhD (she/her)

Health Research
Charities Ireland
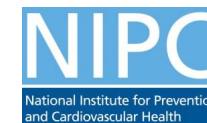

# What do we mean by value and how do we achieve it?

Clinical effectiveness

cost-effectiveness

patient needs & preferences

Consider all types of value

Plan for value from research conception

= increased likelihood of a positive assessment of value

EVIR — ENSURING VALUE IN RESEARCH

Relevance and expressed need		High quality research that minimises bias		Open and transparent research and research funding
Set justifiable research priorities	Design, conduct and analysis are robust and appropriate	Regulation and management are proportionate to risks	Complete information on methods and findings are accessible and usable	Findings are appropriately and effectively disseminated
Priorities are set involving those who use and are affected by health research New research should be set in the context of a systematic review or rigorously determined evidence gap	Designed using advances in research methods and taking steps to reduce bias Studies registered at inception	Actively manage research in a risk proportionate way Protocols, methods and materials should be made available early	Methods, interventions and findings reported in full Support replication and reuse of data	Findings should be set in the context of previous evidence and systematic reviews Disseminate knowledge to end users. Usage of new knowledge should be supported and facilitated

RECOMMENDATIONS

1. Plan a **pathway** to impact

2. Tailor **communications** on research output for relevant audiences

3. Improve collection and use of **health and social care data**

4. Ensure **inclusion costs** for societal partners

5. Articulate the evidence needed to **inform policy**

6. Establish research impact **communities of practice**

7. **Co-create** projects with PPI contributors and key potential end users

# How do we know what the unmet health & social care needs are?

Undertaking literature searches

Attending conferences

Learning from healthcare professionals

Public & patient involvement

What do you feel about public and patient involvement?

How to approach the involvement of patients and charities

- Engage early
- Consider diversity
- Make it meaningful
- Aim for partnership
- Feedback to them
- Lead with respect

How might PPI contributors be involved in cancer research?

OUTCOMES THAT MATTER TO PATIENTS

Gene expression profiling tests to guide adjuvant chemotherapy use in patients with early stage breast cancer

How HRCI member charities support research

Based on the responses of 25 member charities to a HRCI survey in 2023
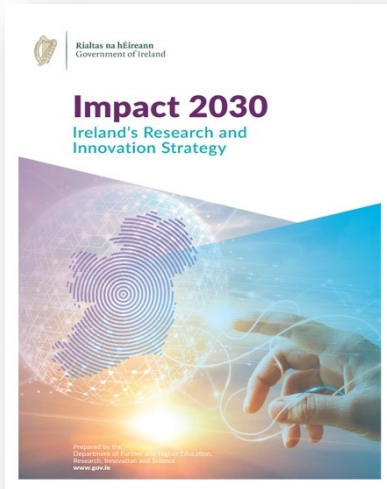

A wider culture shift towards inclusion, impact & value

What can you do?

Think broadly about what we mean by value

Always ask 'who else should be in the room?'

Whatever your role, be relentless about achieving about value from research
