In-patient pyrexia

Actions: isolation, medical review, tests and investigations as per history and clinical findings. Management as per differential diagnosis.

COVID-19 testing

SARS-CoV-2 detected
- Isolate and transfer to C19 care area/centre

SARS-CoV-2 not detected
- Alternate diagnosis consistent with clinical findings with supportive diagnostic results
- Clinical findings consistent with alternate diagnosis but no supportive results
- Clinical findings consistent with RTI with no alternate pathogen

Treat as alternate diagnosis
- Treat as alternate diagnosis, maintain isolation, retest if clinically appropriate

Treat as C19, cover for CAP or HAP as appropriate
