

AREC guidance notes for researchers:

Documents to be sent to the Health Products Regulatory Authority (HPRA) to obtain an animal licence:

- AREC review involves the evaluation of both the **project and individual authorisation applications** together with a copy of the **protocol**
- HPRA in turn request a pdf of the **final version of the REC application** which include any changes/modifications (requested by the REC) but also separately the list of questions requested (i.e. the REC revision letter) & subsequent responses so HPRA can determine which questions have already been asked.
- REC Approval letter including signature of the statistician to declare they have approved the numbers (electronic signature is sufficient)
